9.10 Ergonomics Program

Saint Mary's Ergonomics Program was established for all job processes or operations where repetitive motion injuries or work-related musculoskeletal disorders (WMSDs) have occurred. It is designed to minimize the number and severity of WMSDs employees may experience by identifying and controlling the hazards that could possibly cause or contribute to the WMSDs.

Applies to – All faculty and staff employees

Training required – Training is not required, but optional training is periodically provided.

Standards' location – EH&S website, Human Resources website, and hard copy in Facilities Services.
